PROFILE

"I'm a 20-year-old full-stack developer with a passion for turning ideas into functional, elegant digital solutions. Currently pursuing my bachelor's degree in computer science, I'm also diving deep into AI/ML, driven by the goal of transitioning into an AI/ML engineering role."

TEAMWORK EXPERIENCE

Image Editing Via Prompt (Simbolo AI Course)   2023
Team of 4 | Role:Data Preprocessor

- Collaborated with a small team to develop an AI-based image editing tool that performs edits based on text prompts (e.g., "change the brightness to 50%," "crop the image").
- Collected and cleaned image datasets and paired text descriptions to ensure data quality and relevance.
- Strengthened skills in teamwork, AI concepts, and real-world problem solving.

Meals on Wheels – Web Application (PHP Laravel)   2024
Team of 4 | Role: Full-Stack Developer

- Worked on a Laravel-based food delivery app focused on meals for the elderly.
- Implemented registration, meal planning, donation integration, and real-time delivery tracking.
- Used Git for version control and ClickUp for project/task management with team collaboration.
